

PACIFIC SEA SALT – COARSE

NAME: PACIFIC SEA SALT – COARSE – NO ADDITIVES

DESCRIPTION

This Pacific natural sea salt is harvested from the clear waters of the great southern oceans where waters are evaporated using the natural process of sun and wind. Harvested annually, the salt is carefully gathered to maintain the balance of minerals naturally present in the sea. Pacific natural sea salt contains higher levels of Calcium, Magnesium and other minerals than normal table salt. This Natural Sea Salt is certified for all natural labeling and as an input in organic food processing.

APPLICATIONS

Intended for a variety of food processing applications, including baking, Soups, cheese manufacturing, meat processing, seasonings and prepared mixes. This is also popular salt for topping pretzels, crackers and processing tomato products.

PACKAGING AND STORAGE

Ideal storage is a cool, dry area, relatively free of drafts, where humidity remains below 75%. Under these conditions, the shelf life is at least 5 years though some caking may occur as no free flowing agents are present.

METHODS OF ANALYSIS

Methods of analysis complies with FSANZ Food Standards Code Volume 2 Standard 2.10.2 and is annually certified as Kosher, Halal and Non-GMO.
